

Set Up POP - iPhone™, iPad™, iPod®

Steps are compatible with 3G and 4.0. To set up POP, do the following:

1. Tap **Settings**.

2. Tap **Mail, Contacts, Calendars**.

3. Tap **Add Account**.

4. Tap **Other**.

5. Tap **Add Mail Account**.

6. Enter the following information in the spaces provided:

- **Name**—Enter your first and last name. This is the name that will appear in the **From** field of messages you send.
- **Address**—Enter your entire email address (e.g., myname@mydomain.com).
- **Password**—Enter the password for your email account.
- **Description**—Enter a descriptive name for the account (e.g., Work Account). This description will be visible only to you.

7. Tap the **Save** button.

8. Tap the **POP** button.

9. Under both the **Incoming Mail Server** and **Outgoing Mail Server** sections, enter the following information:

- **Host Name**—Enter the secure server name: **secure.emailsrvr.com**
- **User Name**—Enter your entire email address (e.g., myname@mydomain.com).
- **Password**—Enter the password for your email account.

The image is a screenshot of the "Add Mail Account" screen on an iOS device. It is divided into two main sections: "Incoming Mail Server" and "Outgoing Mail Server". Each section contains three input fields: "Host Name", "User Name", and "Password". The "Host Name" field in both sections is filled with "secure.emailsrvr.com". The "User Name" field in both sections is filled with "myname@mydomain.com". The "Password" fields are filled with eight blue dots. The "Incoming Mail Server" section is highlighted with a light blue background, while the "Outgoing Mail Server" section has a white background.

10. Tap the **Save** button.

11. The device will verify settings and return to the **Mail, Contacts, Calendars** screen.
